

Connect Google to Native iOS Apps

Add a WCPS Google account to the built-in Mail, Contacts, and Calendar apps on an iPhone or iPad.

Before you begin: Menu names vary by iOS version. On newer devices, look under Settings > Apps > Mail > Mail Accounts. Use only division-approved devices and accounts.

STEP 1 Open the account settings

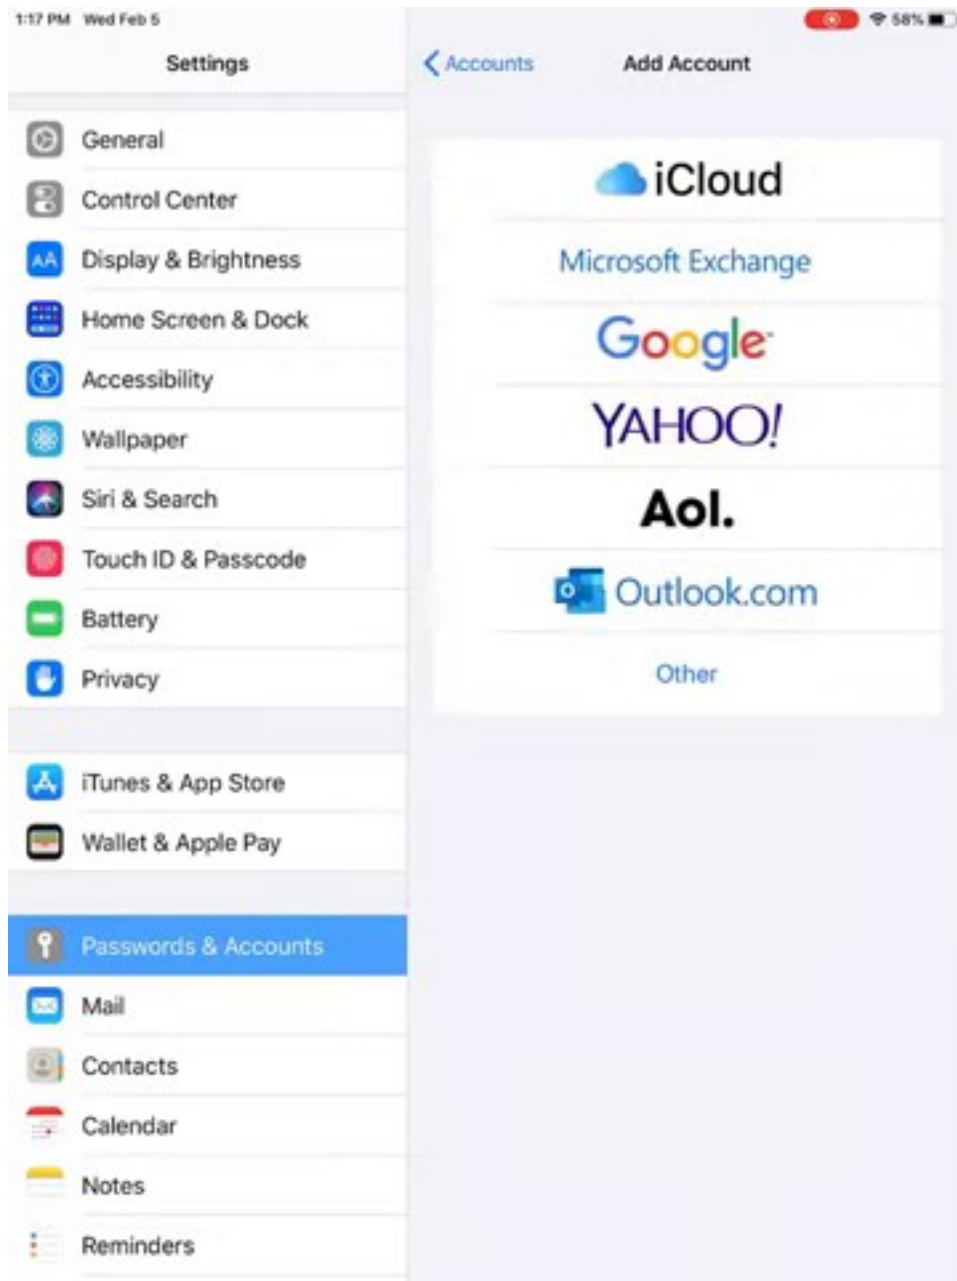

Open Settings. Find Mail or Passwords & Accounts, then select Add Account.

Open the account settings.

STEP 2 Choose Google

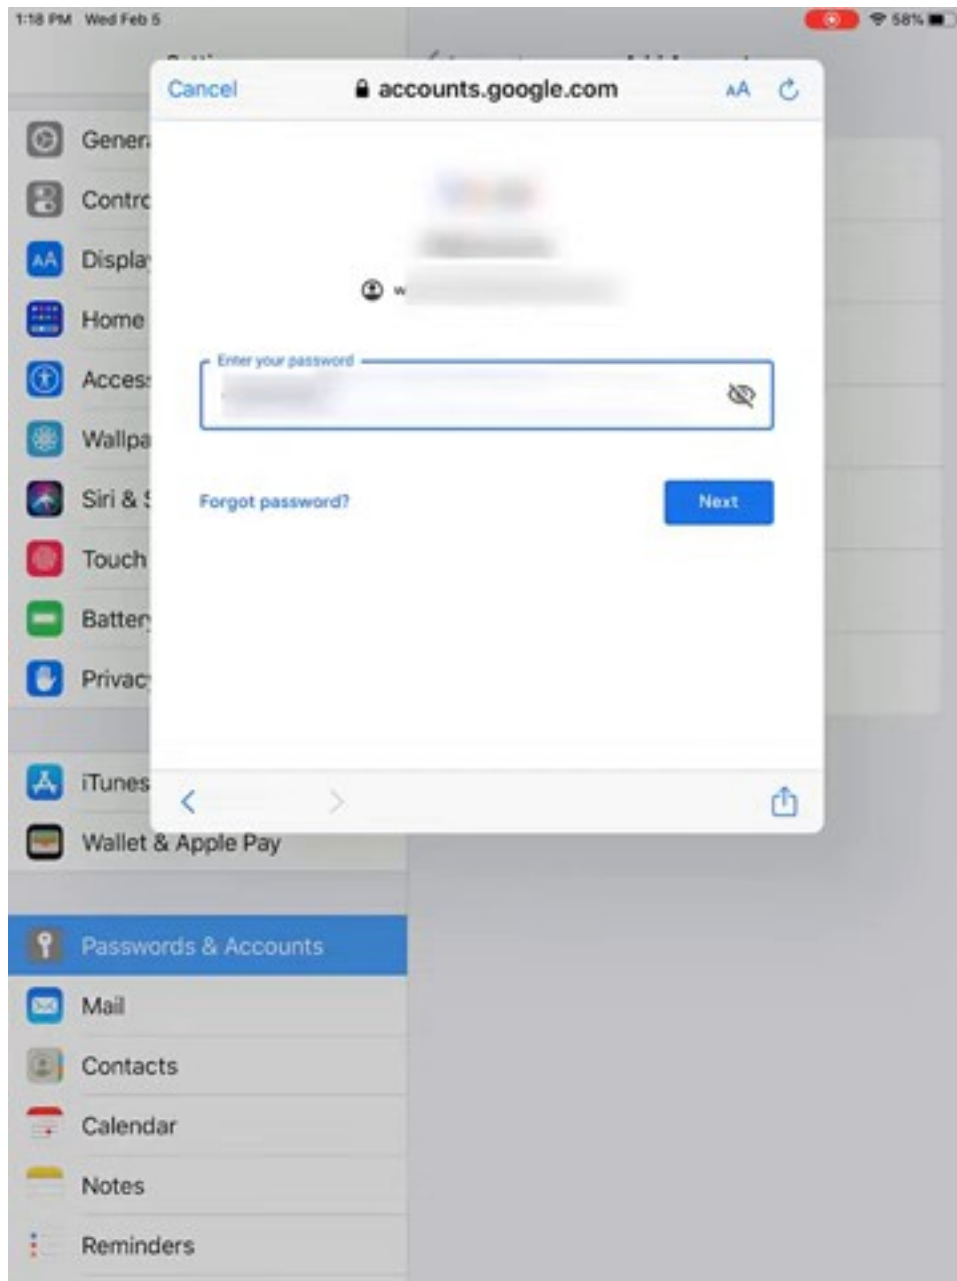

Select Google from the list of account providers and approve the prompt to continue to Google's sign-in page.

Choose Google.

STEP 3 Sign in

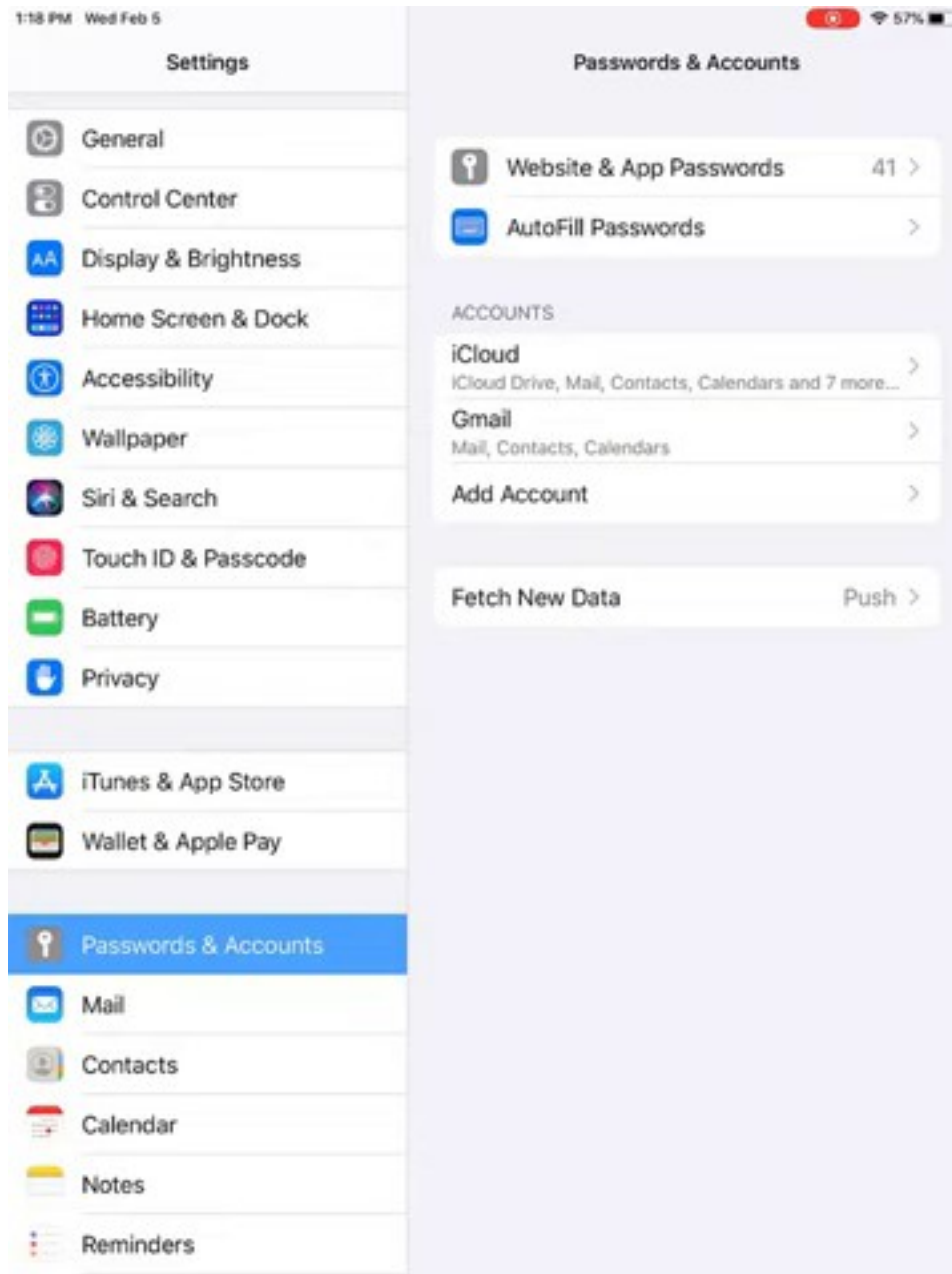

Enter your complete WCPS Google email address, select Next, and complete the division sign-in and verification prompts.

Sign in.

STEP 4 Choose what to synchronize

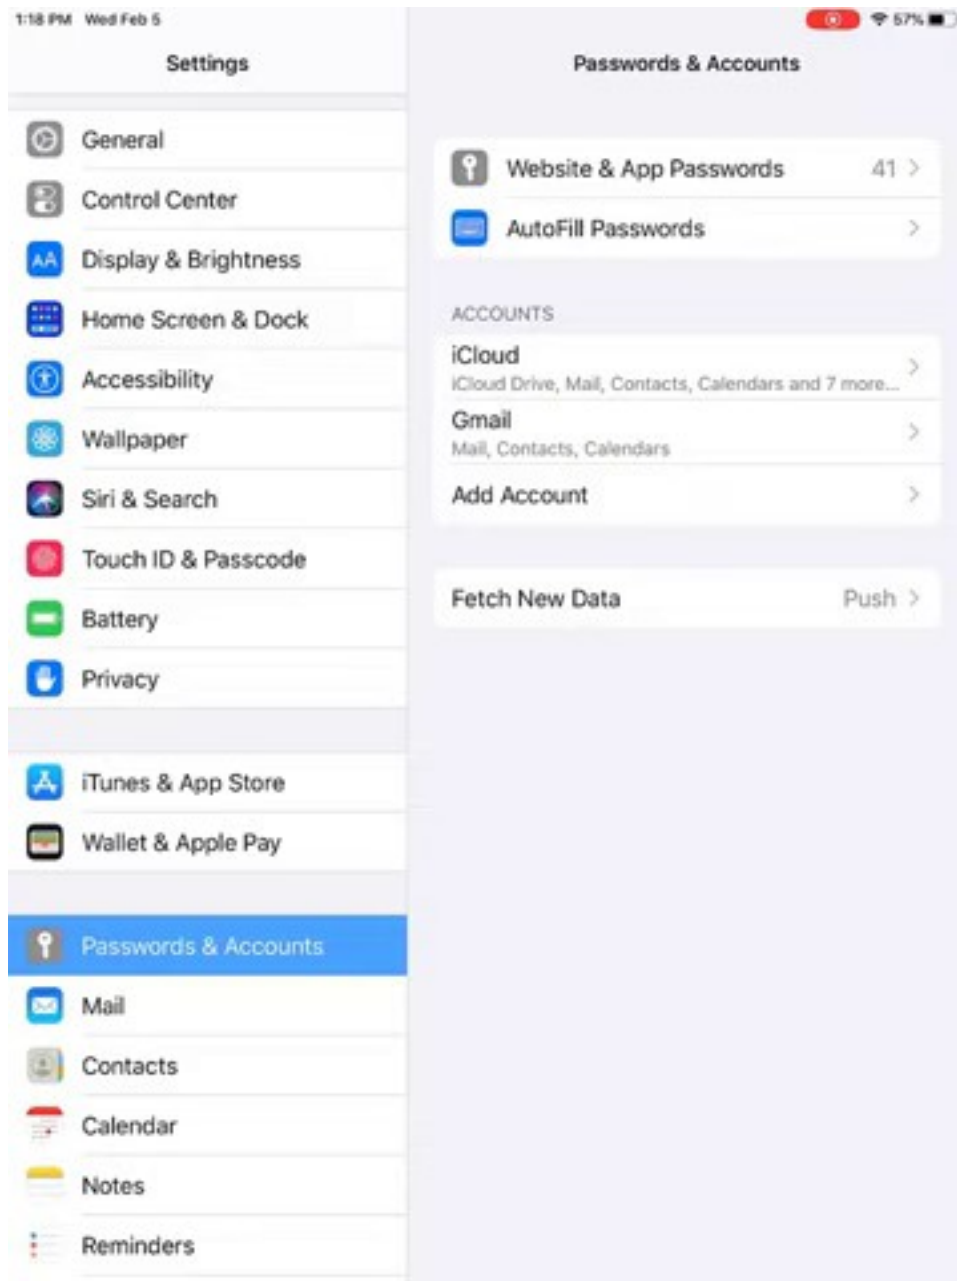

Turn on the services you need, such as Mail, Contacts, and Calendars, then select Save.

Choose what to synchronize.

STEP 5 Confirm the account

Return to the account list and confirm the WCPS Google account appears. Open Mail or Calendar to verify that information synchronizes.

Confirm the account.
